

USER INFORMATION

Thank you for purchasing ALFA! This disposable electronic cigarette (e-cigarette) is intended for vaporizing and inhaling E-liquid and is designed for 600 puffs (with a puff duration of 1.5 seconds).

Usage

Before use, remove all silicone caps on the mouthpiece and on the air inlet at the bottom end of the device. The ALFA e-cigarette is activated by taking a puff (inhalation) through the mouthpiece. Please take care not to cover the air intake opening or blow into the mouthpiece as this may damage the automatic draw. The ALFA e-cigarette must not be used at temperatures below -10°C or above 60°C.

Cleaning: Do not clean the device under running water! For exterior cleaning, use only a damp clean cloth.

Storage: Keep the device out of the reach of children in a dry place, the device must not be exposed to direct sunlight. Under no circumstances should you open the device.

Ingredients (e-liquid)

ALFA 2% nic.: Vegetable glycerin, propylene glycol, aromatic substances, nicotine benzoate 2%

ALFA ZERO: Vegetable glycerin, propylene glycol, aromatic substances

Contraindications

ALFA cigarettes should not be used by the following people: adolescents and children, pregnant and lactating women, people with cardiovascular diseases and cancer, or who are being treated with antidepressants or asthma medications, people with respiratory diseases or allergies to the product's ingredients. This product contains glycerin. Glycerin can lead to hyperglycemia or glucosuria in diabetic patients.

Warnings

This product contains nicotine (except ALFA ZERO): it is a highly addictive substance. Avoid skin/eye contact with e-liquid. Not recommended for non-smokers. The sale of the product to children and adolescents under the age of 18 is prohibited. Keep the product out of the reach of children and adolescents!

Recycling

The meaning of the "crossed out waste container" symbol: The symbol points out that every device must be separated from unsorted municipal waste. The Alfa is made in an aluminum housing that can be fully recycled. The device has a built-in battery that can also be recycled, so we recommend that you dispose of the used device in the e-waste and waste battery collectors.
